

Stainless Steel Embedded Underwater LED Light

Stainless Steel Embedded Underwater LED Light is designed for a sleek, permanent installation inside the pool wall, providing a clean and modern lighting effect.

The housing is made from high-grade 304/316 stainless steel, ensuring superior corrosion resistance and long service life, even in saltwater pools.

With IP68 waterproof protection, energy-saving LEDs, and a compact embedded design, this light combines elegance, durability, and performance — perfect for both residential and commercial swimming pools.
